

# Jason D. Ray

## ENDPOINT CONFIGURATION & SYSTEMS SUPPORT ENGINEER

Kansas City, MO | jasondray@gmail.com | www.linkedin.com/in/jason-ray-mecm

### PROFILE

Highly accomplished and seasoned technology specialist with over two decades of experience supporting large-scale corporate computing environments across thousands of devices within distributed locations. Proven expertise in managing end-to-end workstation lifecycles, from initial build through ongoing maintenance, updates, and retirement, while ensuring reliability and performance continuity. Highly effective in developing custom command-line solutions to streamline monitoring, self-healing, analytics, and operational workflows. Strong background in enforcing organizational safeguards, access controls, and compliance standards aligned with enterprise governance models. Known for resolving high-severity incidents through methodical troubleshooting, impact analysis, and corrective action planning to minimize service disruption. Broad exposure to modern infrastructure initiatives, including remote workspace modernization and application delivery transformation, bringing a flexible, enterprise-wide perspective to complex technical landscapes.

### TECHNICAL PROFICIENCIES / AREAS OF EXPERTISE

**Endpoint & Systems Management:** Microsoft Endpoint Configuration Manager (MECM/SCCM), Intune Co-Management, BITLOCKER, RBAC, Configuration Baselines

**Automation & Scripting:** POWERSHELL Scripting (Packaging, Remediation, Reporting, Process Automation), Python Scripting for Automation

**OS Deployment & Image Management:** Golden Images, Task Sequences, Bare-Metal Deployment, Refresh, In-Place Upgrade (IPU), Driver Management

**Application Management:** MSI/MSIX/AppDeploy Toolkit Packaging, Deployment, Detection, Supersedence, MSIX App-Attach for AVD, App Masking

**Patch & Compliance Management:** WSUS/SCUP, ADRs, Patch Tuesday Testing, Phased Ring Deployment, System Hardening

**Security & Identity:** Hybrid Azure AD/Entra ID management, Encryption, RBAC Enforcement, Baseline Compliance

**Virtualization & Lab Environments:** Docker Containers, Linux Server VMs, multi-OS Environments

**Emerging Skills:** Python Scripting for Automation, AVD Optimization

### SIGNATURE ACCOMPLISHMENTS / PROJECTS

#### Wyse Management Server & Dell/Wyse Thin Client Management:

- Managed Wyse Management Server (WMS) and supported 800+ Dell/Wyse thin clients, ensuring seamless connection to Citrix Workspace environments by performing deployment, configuration, monitoring, and troubleshooting.
- Maintained day-to-day operations of thin-client infrastructure, resolving endpoint and VDI-related issues to optimize system performance and user experience.

#### Application Packaging & Deployment for Amazon WorkSpaces:

- Packaged and deployed applications to Amazon WorkSpaces, ensuring compatibility, secure delivery, and smooth user experience for enterprise virtual desktop users.
- Collaborated with IT and operations teams to streamline application rollout and maintain a stable VDI environment.

### PROFESSIONAL EXPERIENCE

#### Consolidated Communications / FIDIUM Fiber, Lenexa, KS Technical Support Analyst III (Senior Endpoint Engineer)

Aug 2001 – Dec 2025

Administered enterprise MECM/SCCM environment supporting 2,811 Windows clients across 26 states. Managed end-to-end endpoint operations, including infrastructure health, application deployment, OS imaging/upgrades, patching, boundary alignment, security compliance, and documentation. Collaborated with cross-functional teams to implement IT projects and upgrades. Conducted root cause analysis for recurring endpoint and connectivity problems. Implemented and maintained configuration standards for enterprise devices. Tested and validated new software deployments/updates before production rollout. Supported endpoint lifecycle management, including provisioning, decommissioning, and replacement. Ensured compliance with IT policies, regulatory standards, and security protocols.

**Key Contributions:**

- Maximized system uptime and operational efficiency for a distributed workforce by maintaining system stability and proactively addressing performance bottlenecks.
- Enabled seamless migration from Citrix to Azure Virtual Desktop by coordinating MSIX/AVD packaging work stream, ensuring timely and accurate deployment across environment.
- Minimized vulnerability exposure and ensured regulatory/audit readiness by implementing proactive security measures and continuous monitoring to prevent potential incidents.
- Achieved near-100% Patch Tuesday compliance across 2,811 Windows clients by leveraging WSUS/ADR automation, phased ring rollouts, supersedence management, and rigorous testing/validation cycles.

---

**ADDITIONAL EXPERIENCE**

**Lead Computer Services Technician** | Tech Guys, Overland Park, KS  
**Desktop Support Technician** | H&R Block, Kansas City, MO

---

**TECHNICAL TRAINING**

**System Administrator Certification** | IKON Computer Education & Training, Overland Park, KS

---

**CERTIFICATIONS**

System Administrator Certification, IKON Education  
CompTIA A+ Certification, CompTIA  
Microsoft Certified Professional (MCP)  
Certified Novell Administrator (CNA)

---

**PROFESSIONAL DEVELOPMENT / CONTINUOUS LEARNING**

10+ Years Managing Large-Scale MECM/SCCM Hierarchies, including Task Sequences, Packaging, Automation, and Patching  
Designed and Maintained Home Lab Environments for Containerization, Multi-OS Testing, and Emerging Tech Exploration  
Ongoing Python Certification Training to Expand Automation Capabilities
